

DECKBUILDERS

DESIGNED TO REFLECT A LIFESTYLE

Client: Mr and Mrs R

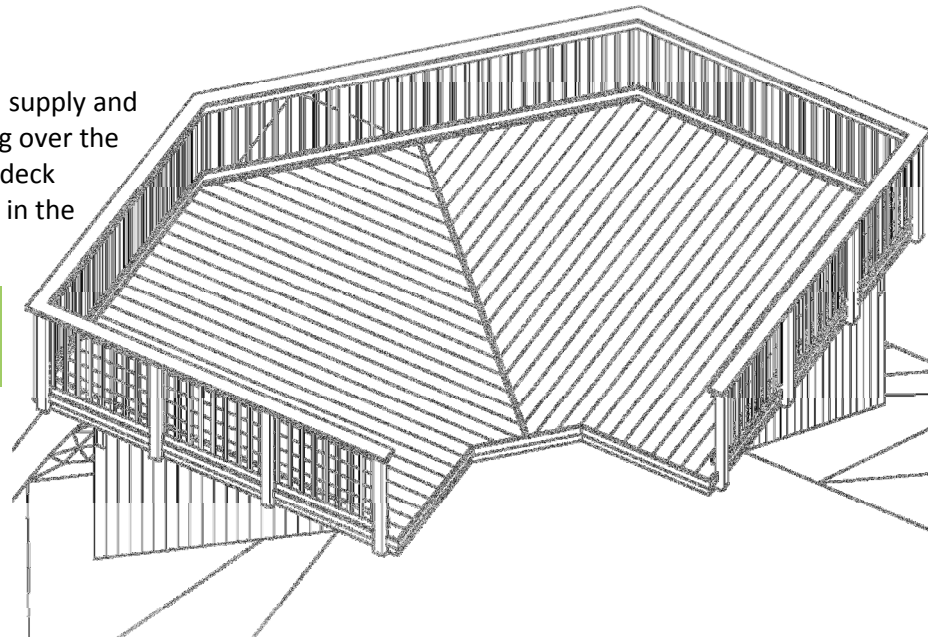

Location: Bewdley

Completed: August 2013

Brief

Deckbuilders were tasked with completing the design, supply and installation of a timber deck with handrails and skirting over the bank at the end of the customers lawn. This beautiful deck has provided the ideal location to go and relax to take in the breath taking views.

Timber Specification

North European Redwood smooth profile deck boards treated with Tanalith E to Hazard Class 4

Design Considerations

Once the design had been worked through with the customer and the 3D design drawings had been approved, full structural drawings were then produced. These drawings detailed all the under structural elements, so essential to completing a safe and sound, long lasting and worry free deck structure for the customer to enjoy for years to come.

"Thanks again to you and your team, it is a fantastic job. I have a lot of jealous friends and have I have already spent many evenings sat out on it"
