

DECKBUILDERS

DESIGNED TO REFLECT A LIFESTYLE

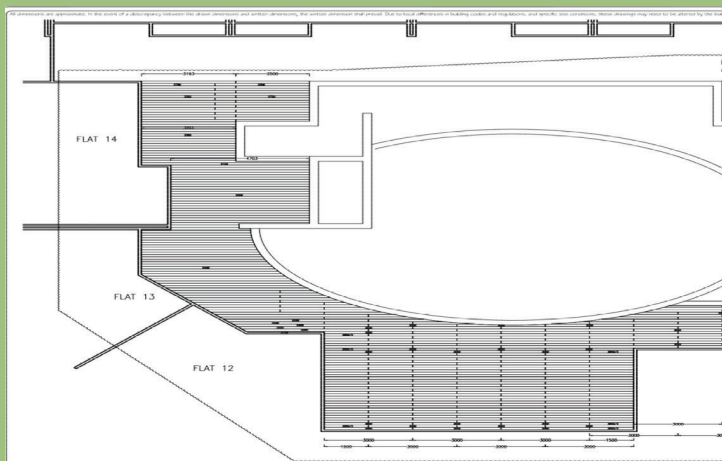

CASE STUDY:

# Hills Construction

**LOCATION:** Redcliffe Point, Bristol  
**COMPLETED:** 2016

Redcliffe Point is a large development of apartments in Bristol.

Deckbuilders were asked to remove and replace 776m<sup>2</sup> of timber decking to the apartments and communal courtyard area on the 4th floor to Redcliffe Point. We were tasked with the logistical nightmare of completing this with apartments being occupied and due to location, no access for skips or cranes for debris removal or timber distribution.

## TIMBER SPECIFICATION

Massaranduba decking with antislip inserts for the communal courtyard laid over iroko joists on pedestals manufactured from our yard in Pershore.
