

DECKBUILDERS

DESIGNED TO REFLECT A LIFESTYLE

CASE STUDY:

Gascoigne East

LOCATION: Barking, London

COMPLETED: June 2023

Gascoigne East is a large development of 446 homes, with playgrounds and treelined streets and courtyards

Deckbuilders UK Ltd were instructed to install multiple benches throughout the courtyard, where there were meandering paved paths, playgrounds and a basketball court. The Benches were made from FSC Cumaru and powder coated mild steel in various shapes and sizes. There was a second communal area, surrounded by apartments where we installed two softwood decks, both had circular seating, play pits and planting.

SYSTEMS USED

We used Anti-slip deckboards throughout, set on a softwood timber joist system treated to Hazard Class 4, and positioned on plastic pedestals.

DETAIL

Softwood timber decking with anti slip boards, approx. 100m². Project design incorporated raised circular seats, circular play areas and planted areas.
